EDUCATION

Master of Commerce *UWA · Perth | Jul 2026 – Jun 2028*

Global commercial strategy, business management & international leadership. CRICOS 00126G.

Industrial Engineering *Universidad Diego Portales | 2020 – 2026*

6-year accredited professional degree (Ingeniería Civil Industrial, Chile). Strengths: Simulation, Strategic Management, Finance, Business Plan.

IELTS Academic *British Council / IDP | May 2026*

Overall 7.5 · C1 CEFR (L 7.0 · R 8.0 · W 7.5 · S 8.0).

SKILLS

Power BI & Dashboards

Data Science (R / RStudio)

Statistical & Financial Modelling (NPV/IRR)

Process Optimisation · Project Management

Strategic Planning · ADempiere ERP

Full-Stack Web & SaaS (JS, React/Next.js, Supabase)

PostgreSQL Data Modelling · Row-Level Security

ERP / MRO Systems · Gantt & S-Curve Planning

LANGUAGES

Spanish — Native

English — Advanced (IELTS 7.5, C1)

SUMMARY

Industrial & Systems Engineer combining quantitative analytics and operational strategy with hands-on product building. Track record at CORFO — Chile's national innovation agency — plus industrial operations in mining services, and founder of RTR, where I design, build and ship web/SaaS products end to end, from data model to deployment. My current system runs in production at a mining-services workshop. Incoming Master of Commerce at The University of Western Australia (Jul 2026).

WORK EXPERIENCE

RTR — Founder *Santiago, Chile | 2024 – Present*

Founder of RTR, a small-medium digital-solutions business delivering custom web and SaaS products end to end — design, development, deployment and client delivery. Six products built; DAICHŌ is deployed and in use at a client site.

CORFO — Innovation Dept. Intern *Santiago, Chile | Apr – Jul 2025*

Built a Power BI dashboard tracking national innovation KPIs, adopted by senior management for strategic planning. Resolved a systemic operational bottleneck via data-driven root-cause analysis.

Servicios Naxos SPA — Engineering Assistant *Santiago, Chile | Dec 2024 – Mar 2025*

Prepared technical bids and cost quotations for heavy mining equipment repair and fabrication.

Servicios MOR — Engineering Intern *Santiago, Chile | Jan – Mar 2023*

Structural steel profile calculations for cost-submission packages; exposure to production workflows and quality control.

PROJECTS — RTR

DAICHŌ 台帳 — Operations system (ERP/MRO) for a mining-services workshop, built solo and deployed: QR shop-floor time tracking, drag-and-drop Gantt scheduling, dynamic per-job quoting, S-curve progress and a client portal. 21 screens, ~11k lines of TypeScript over a 51-table Supabase schema with row-level security enforced per role in the database. (Next.js 16, React 19, TypeScript, Supabase, Netlify) · 2026

NAGARE — Scan-to-order hospitality platform: QR menus, real-time ordering, kitchen display, waiter app and manager dashboard with live KPIs. Built end to end and demo-ready; in conversation with a café for the first live deployment. (JS, Supabase, Netlify) · 2024–Present

SHOKU 食 — Calorie-controlled diet app: meal scheduling every 3–4 h, food-equivalence catalogue, macro tracking, live barcode scanner and realtime multi-device sync. Two deployments — Perth (live) and Chile (in progress). (Next.js, React, Supabase, Vercel) · 2026

MONBAN 門番 — Visitor and vehicle access control for gated communities and residential buildings: WhatsApp entry flow, real-time security-desk alerts, RLS-secured. In final conversations with the property manager of a residential complex in Santiago. (Supabase, Netlify) · 2026

KAKEI 家計 — Personal-finance platform with real open-banking automation (bank sync, auto-categorised transactions, daily email digest). In development toward a commercial release. (Next.js, Supabase, Vercel) · 2026–Present

KARUTE カルテ — QR-accessible medical records: exam history, PDF viewer and segmented video clips, no login required. (Python, ffmpeg, GitHub Pages) · 2026
